

National Conference 2012  
Crown Promenade Hotel Melbourne  
7-10 October 2012

People, Places, Projects... A New Frontier

# The Management of Project Management

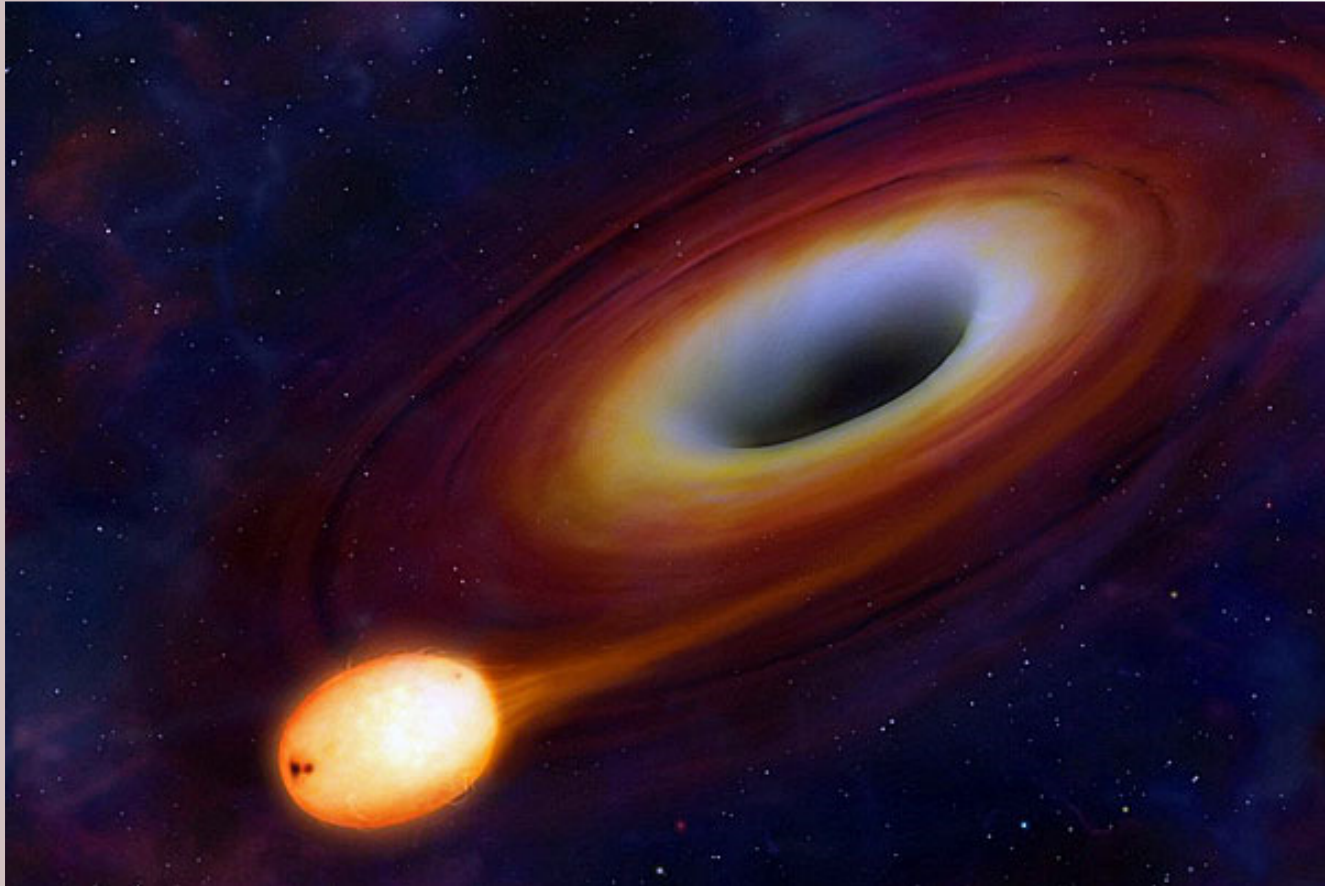

Patrick Weaver FAICD, FCIQB.

Mosaic Project Services Pty Ltd

# Presentation Outline

- Introduction
- The Concept of Project Governance
- The Concept of value
- The Concept of Project Delivery Capability (PDC)
- Conclusions

# Introduction

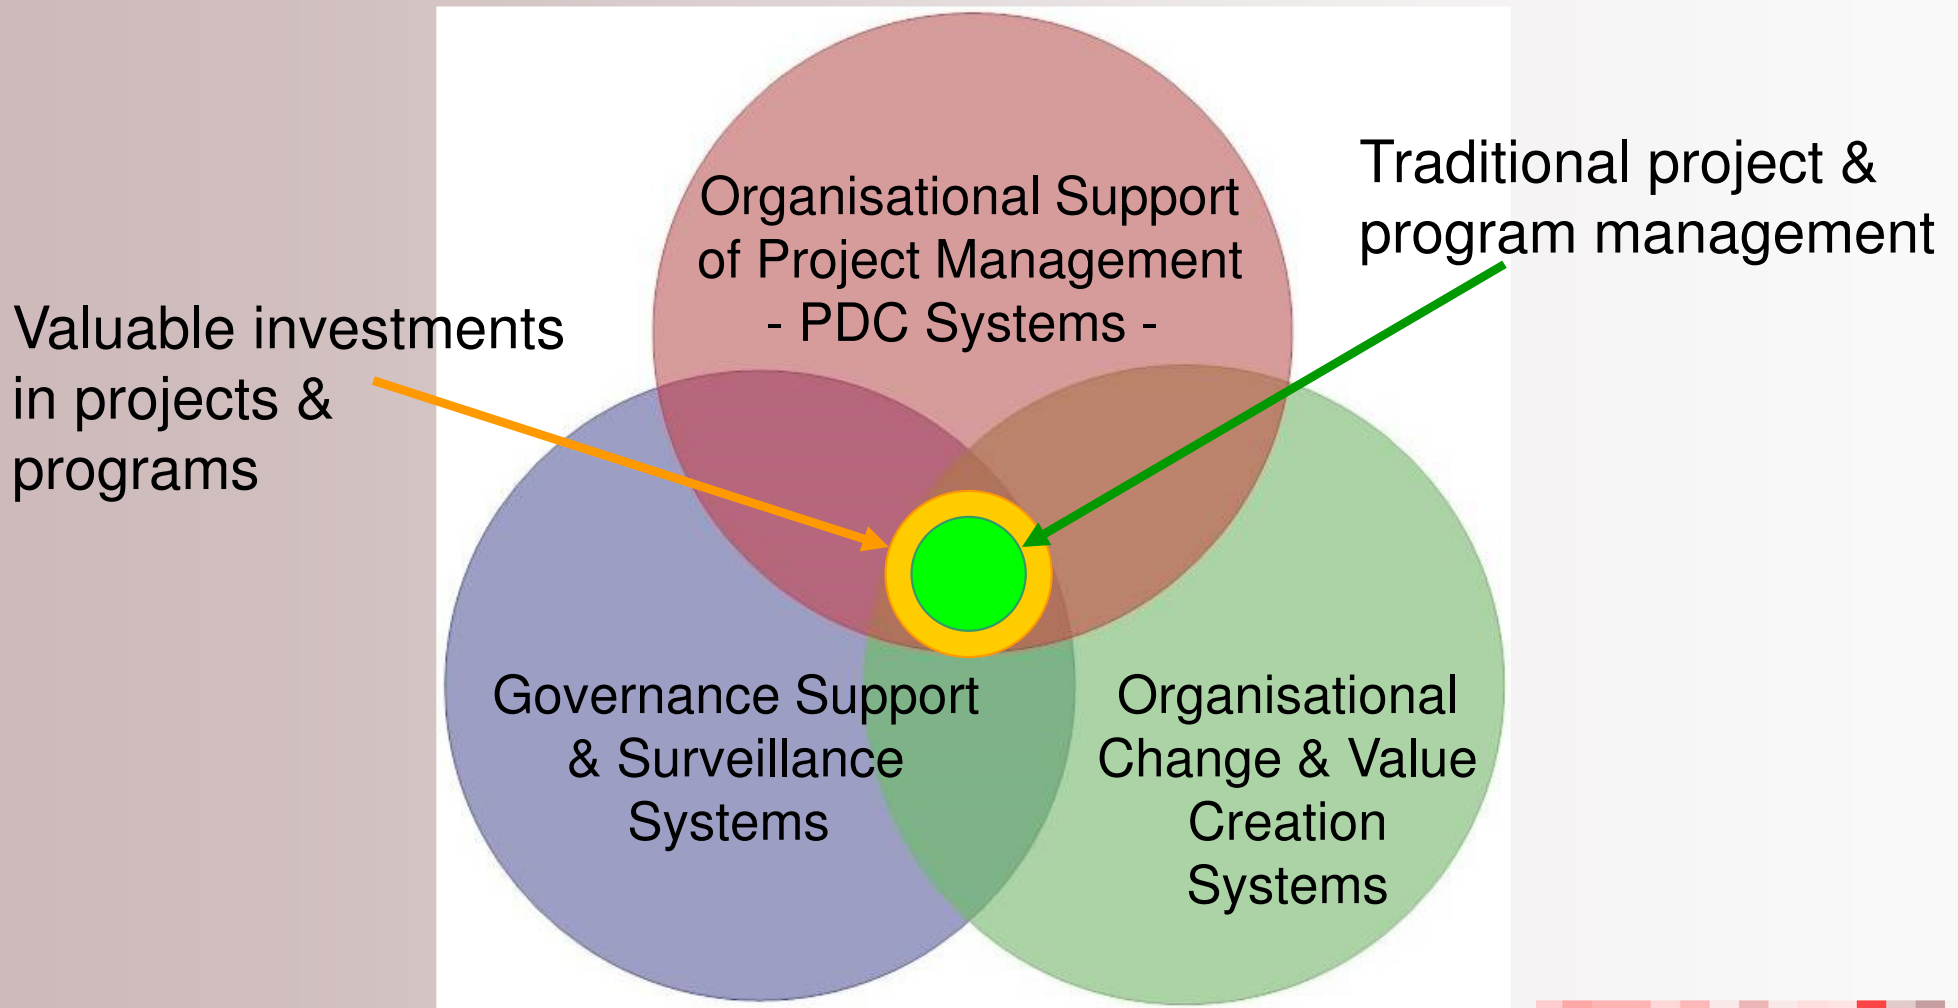

There is a massive governance & management  
'black hole' destroying stakeholder value

# Introduction

- 90% of the time, the concept of ‘project failure’ is executive buck passing
- Organisation’s managements **choose** not to manage their projects well
- But successfully managing ‘projects’ is still only ½ the battle!
- Value creation needs an end-to-end view!
- **Failing to invest in these capabilities is a governance failure**

# Introduction

- The interlinked elements of the 'management of project management'

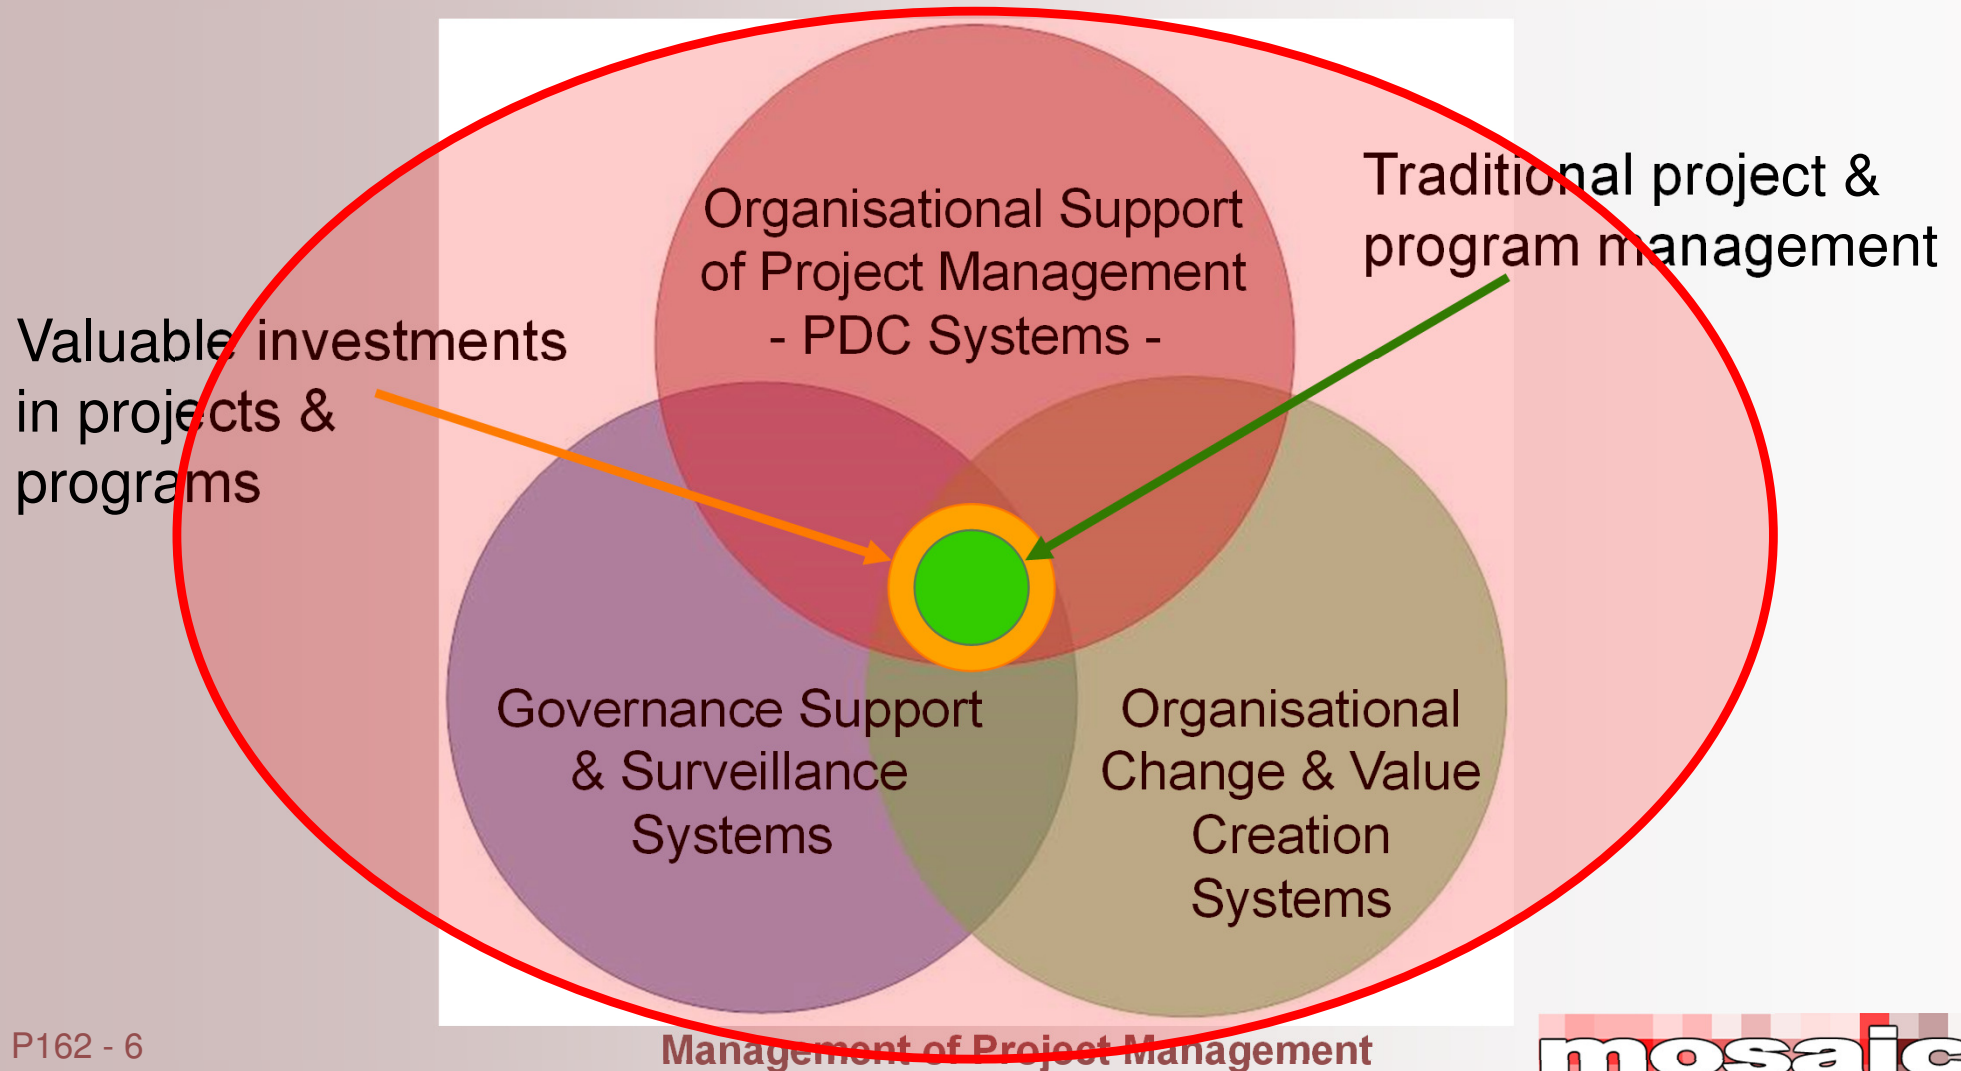

Management of Project Management

# Introduction

## The sphere of 'project governance'

Download the White Paper:

[https://mosaicprojects.com.au/WhitePapers/WP1073\\_Project\\_Governance.pdf](https://mosaicprojects.com.au/WhitePapers/WP1073_Project_Governance.pdf)

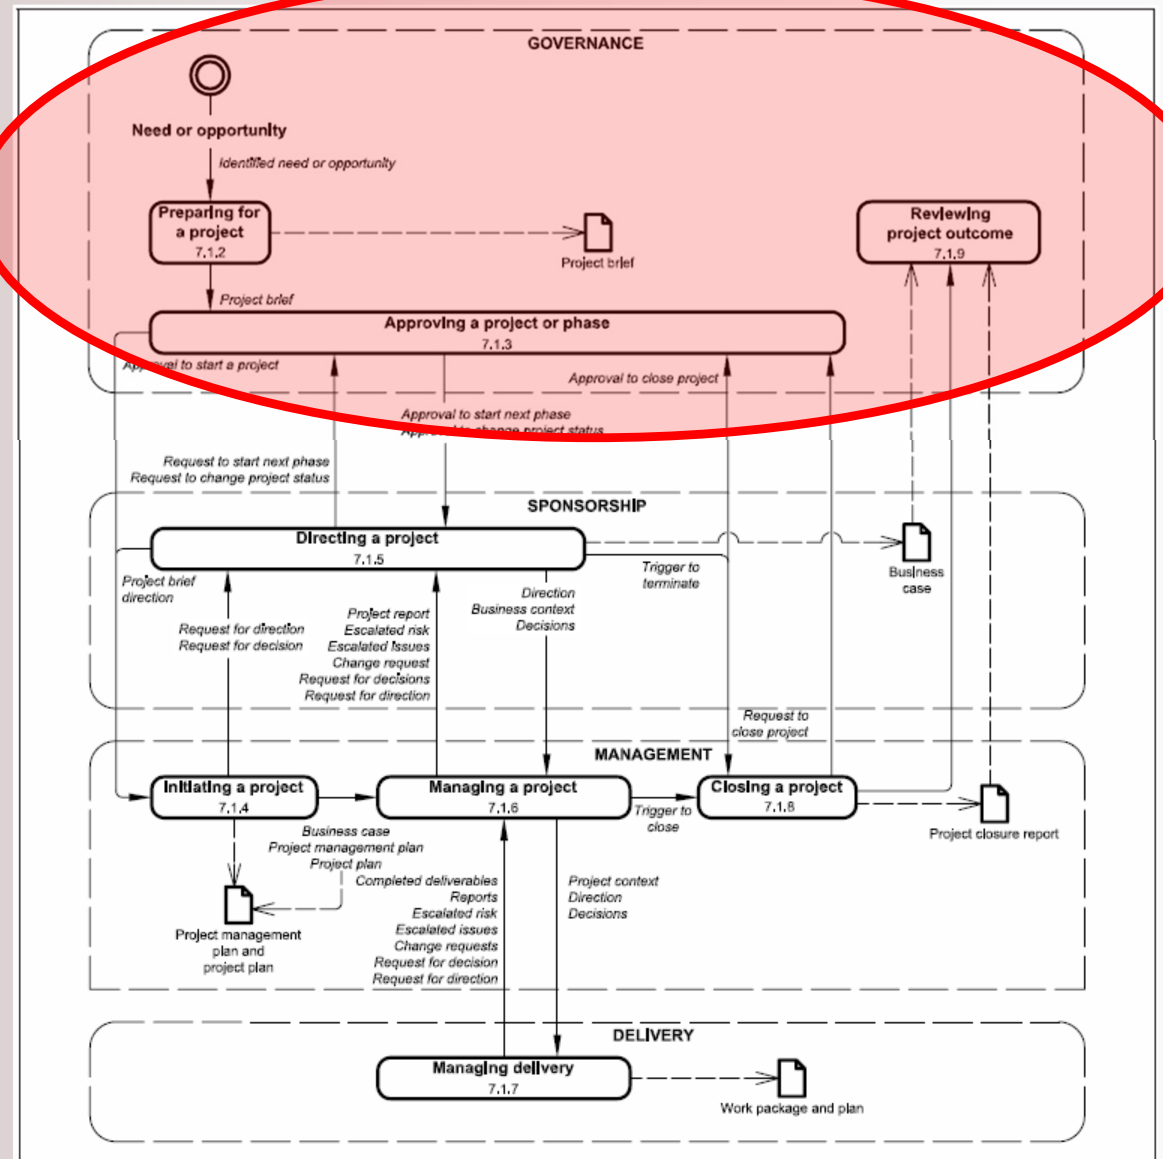

# Governance – Option 1

- All difficult decisions are ‘Governance’
- All oversight roles are ‘Governance’
- Sponsors and ‘Control Boards’ are ‘Governance’
- Proponents: project managers working in IT and government

# Governance – Option 2

- BS 6079: 2010
- Portfolio Mgmt. = Governance
- Other Mgmt. = Management

# Governance – Option 3

- Governance =
  - Concept / Vision / Mission / Attitude & Ethics
  - Strategic objectives / Directions / Oversight
  - Reflection / Asking the **‘right questions’**
- Management =
  - Systems / Processes / Functions / Structure
  - Decisions and Prioritisation
  - Outcomes / Answers
  - Surveillance and Discipline

# Governance – Option 3

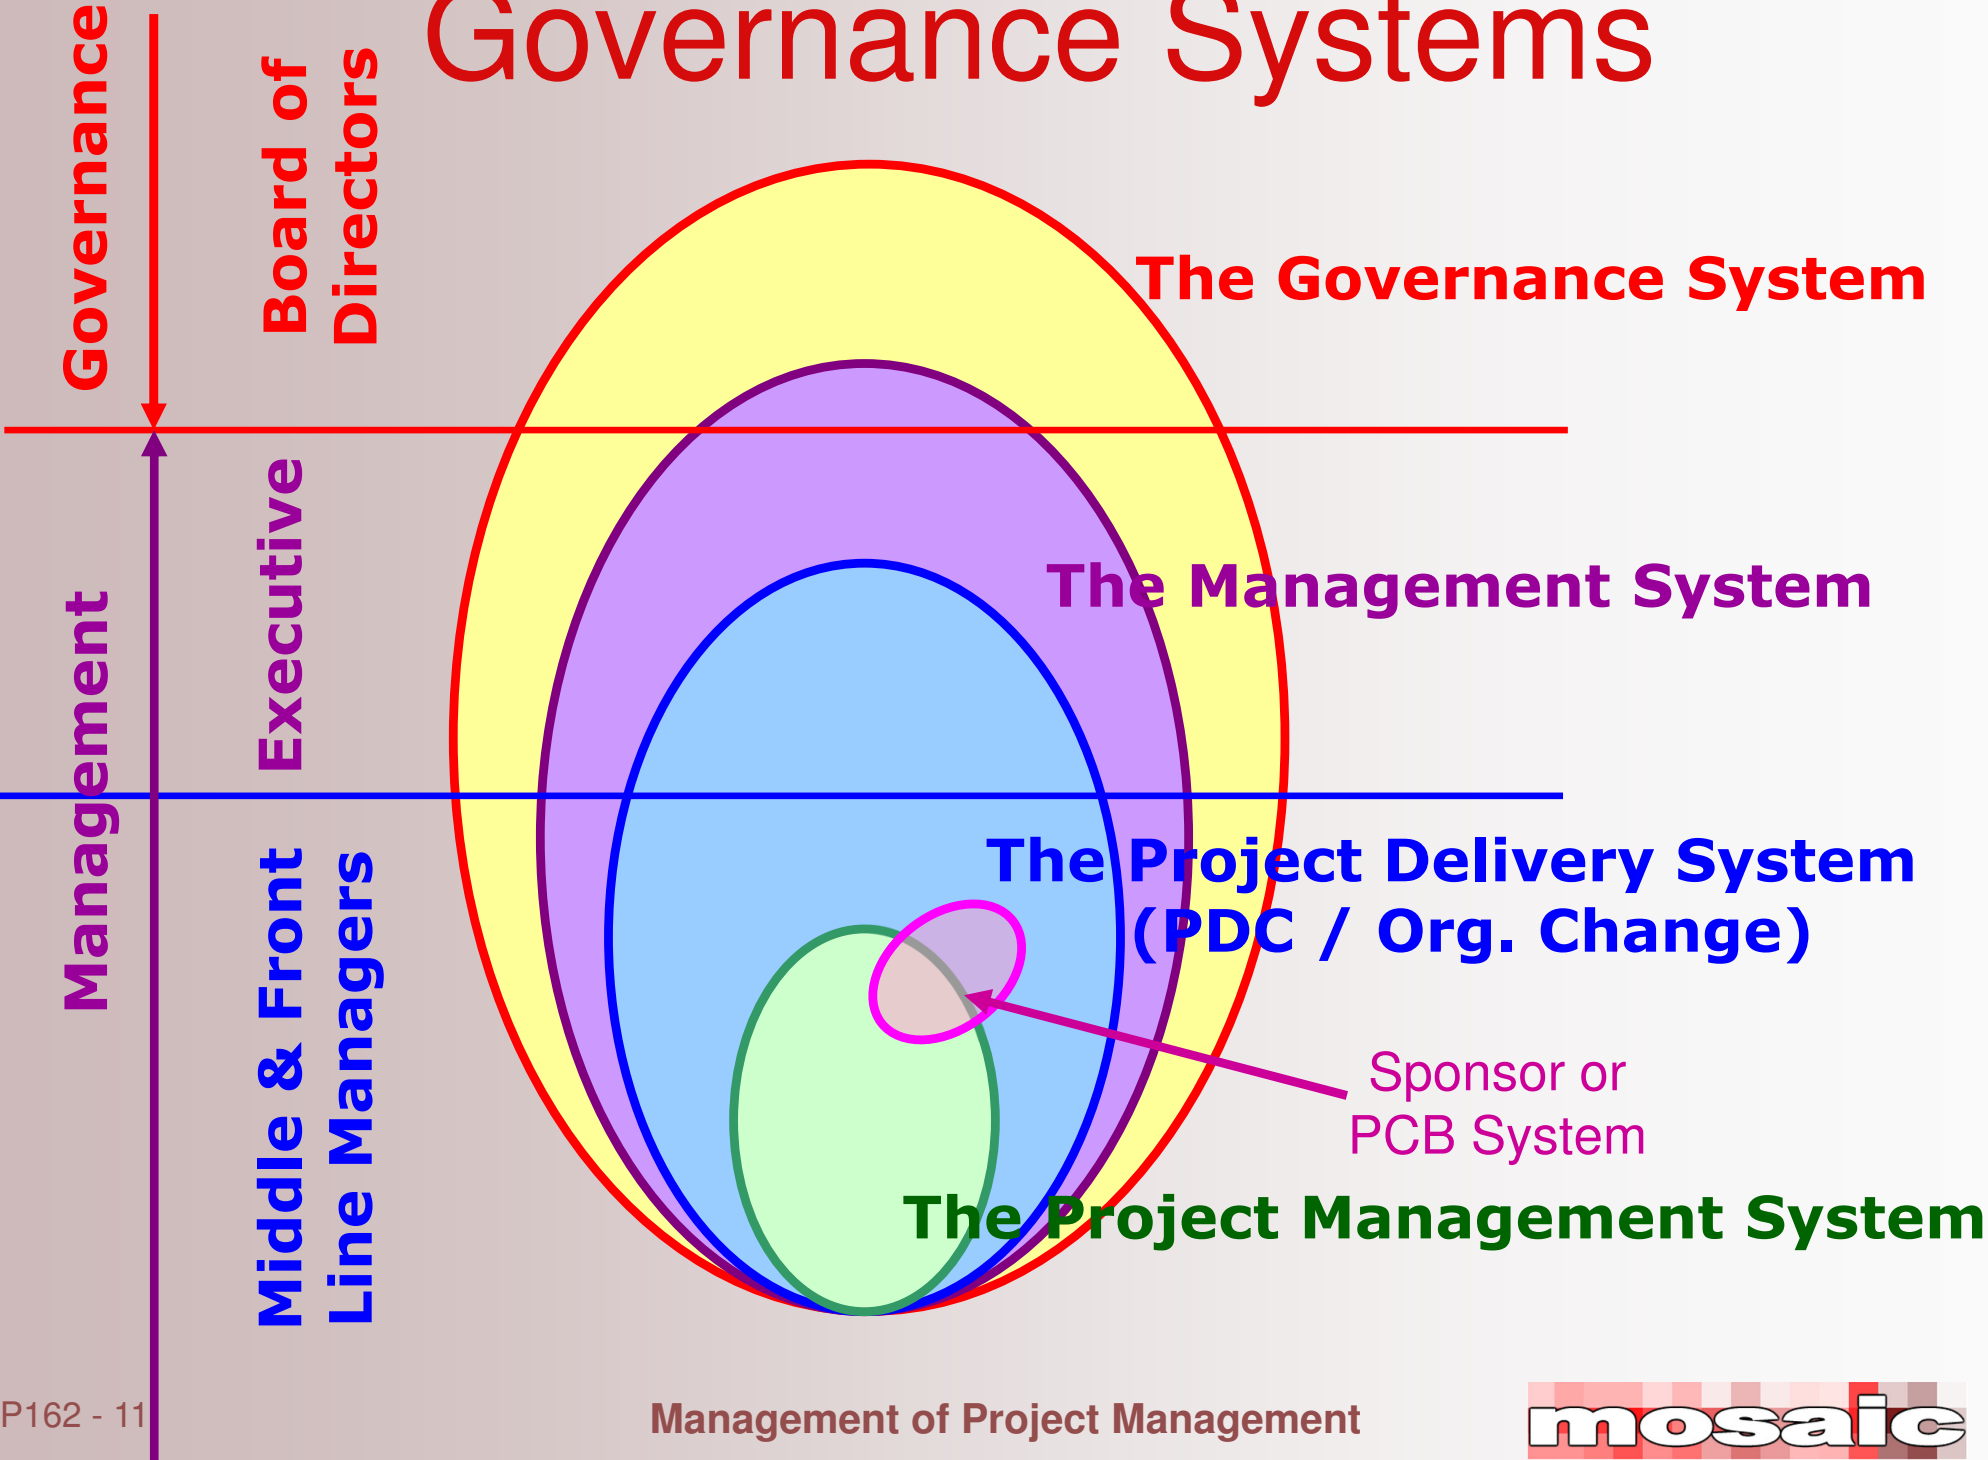

- Proponents: OECD, Stock Exchange, APM

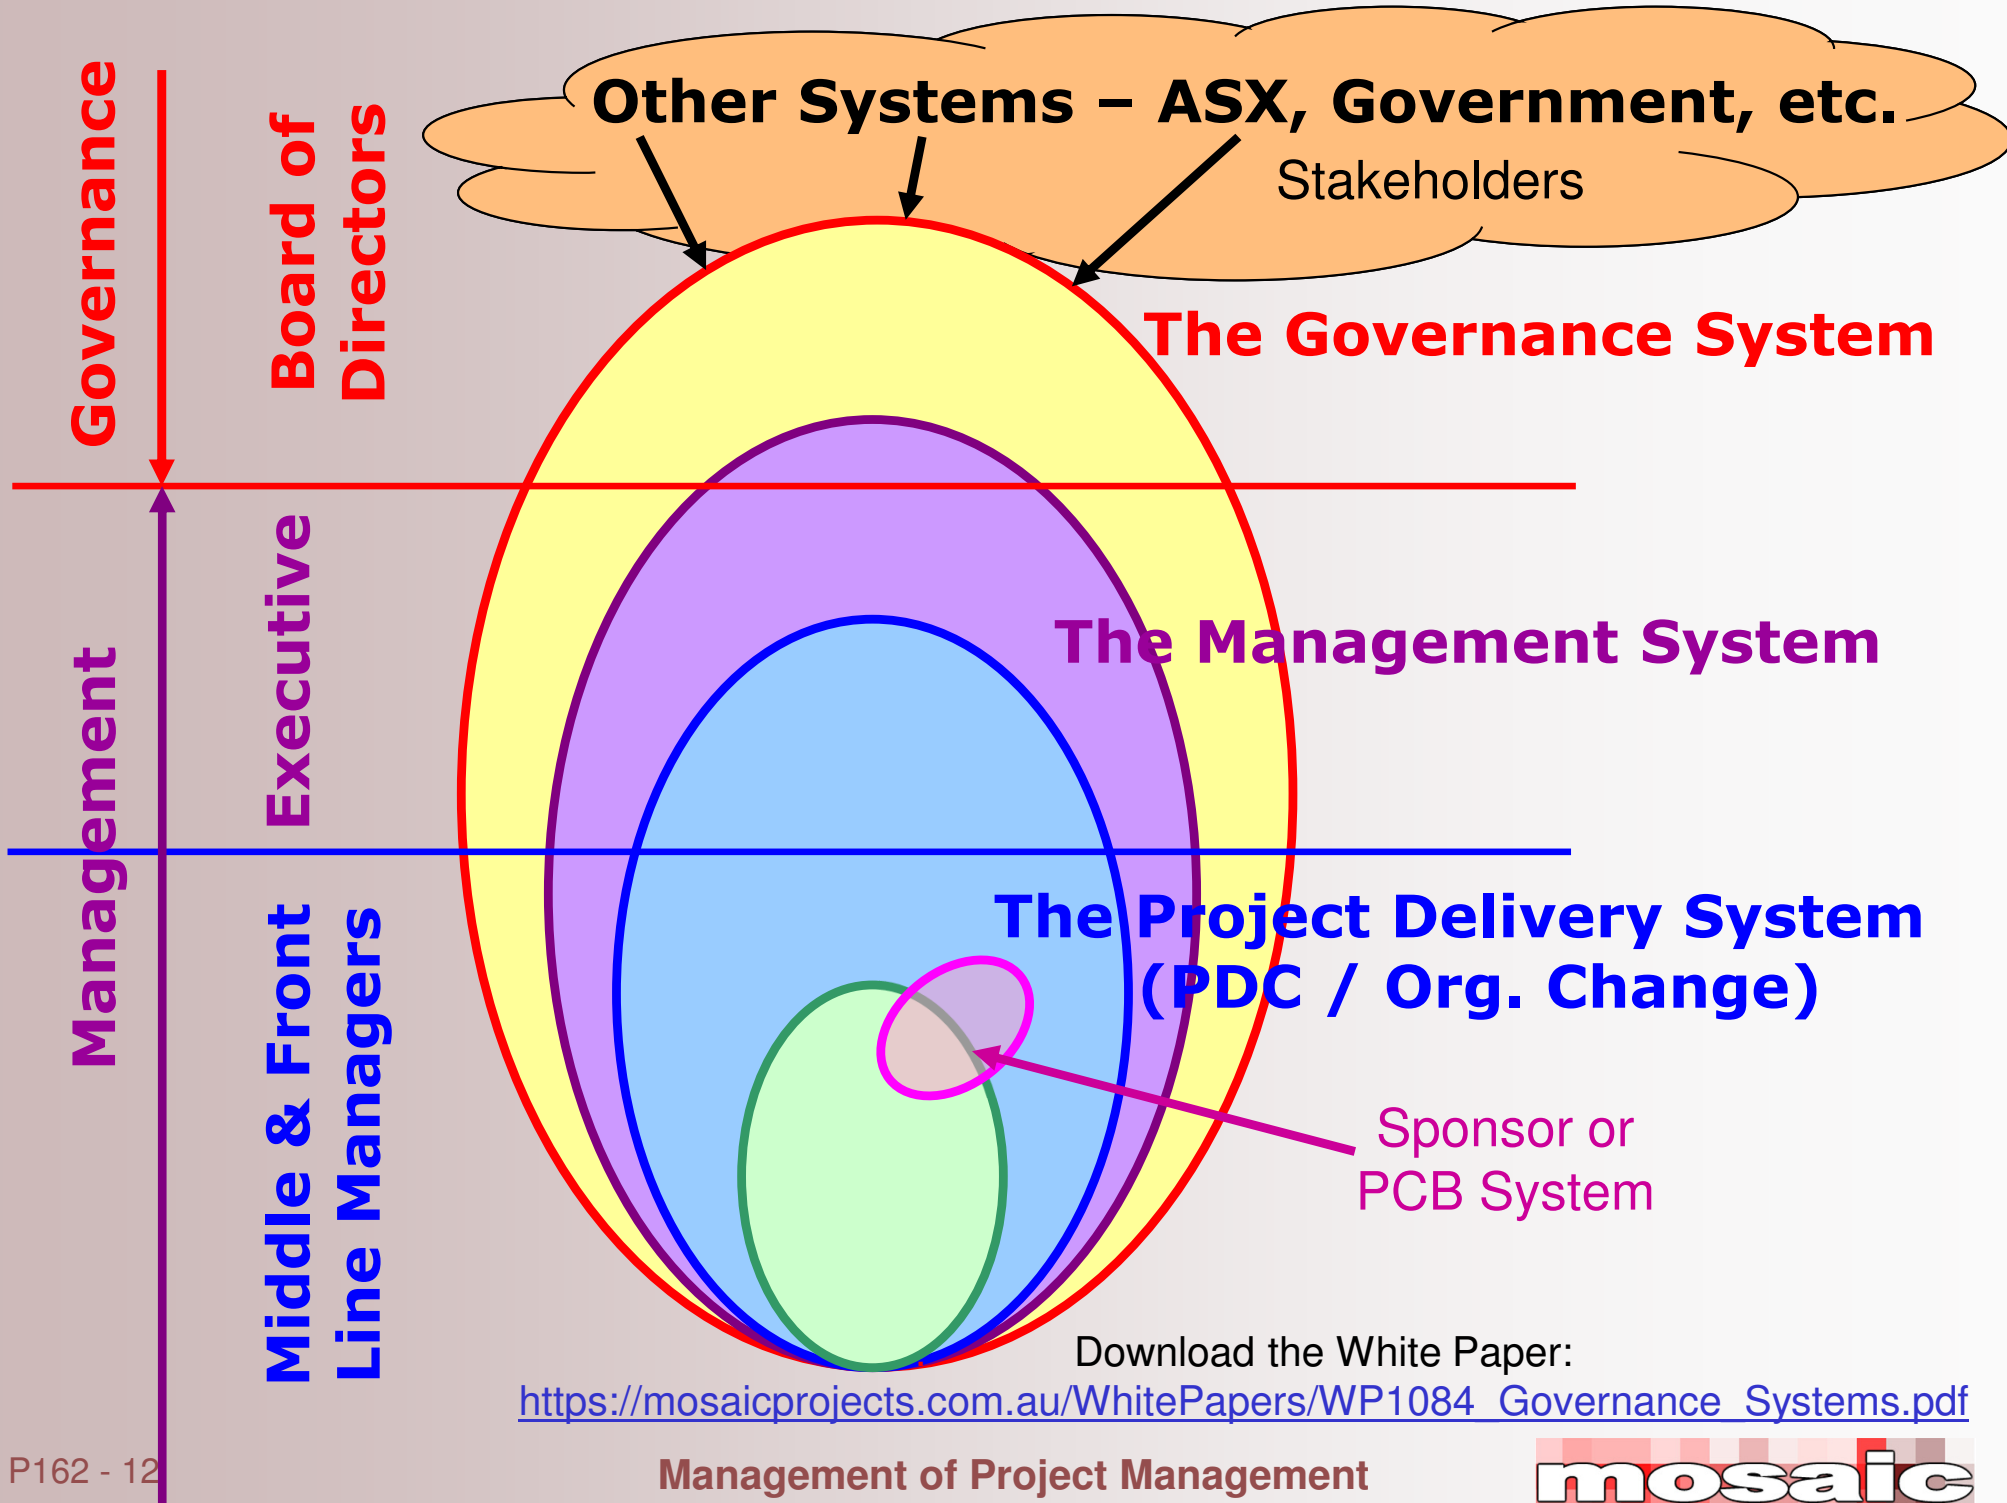

Governance is the means by which objectives are defined & achieved, not the mechanism

**Boards Govern!**

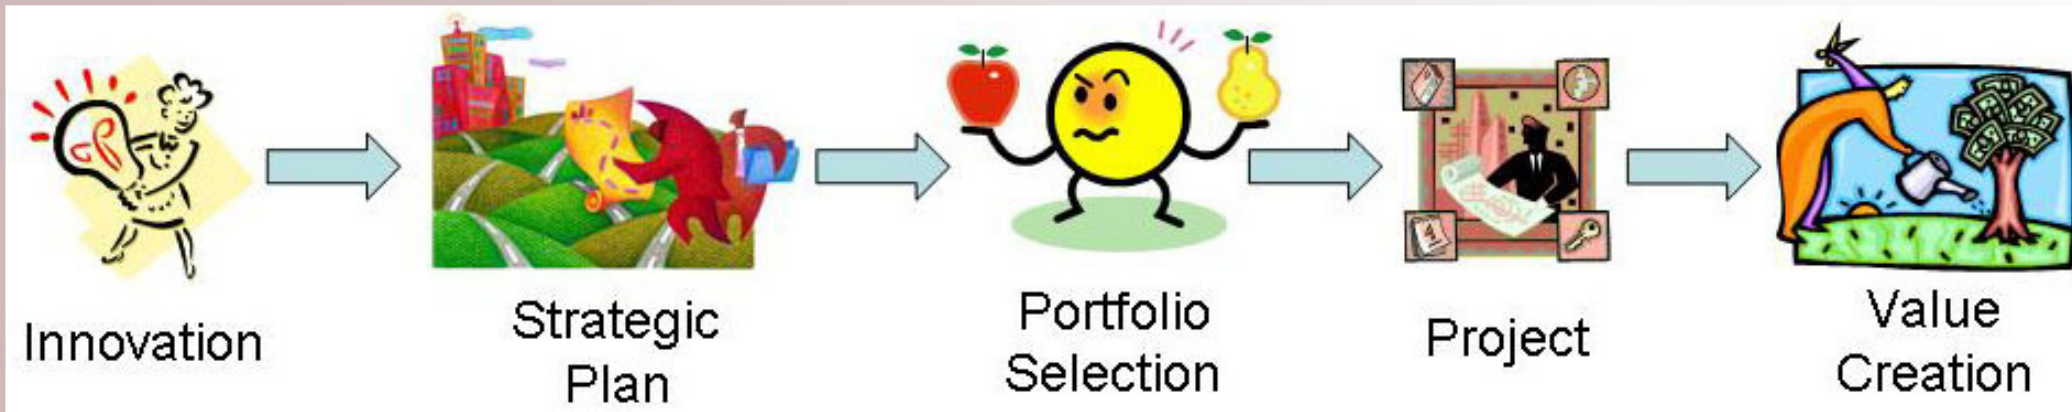

# Governance Systems

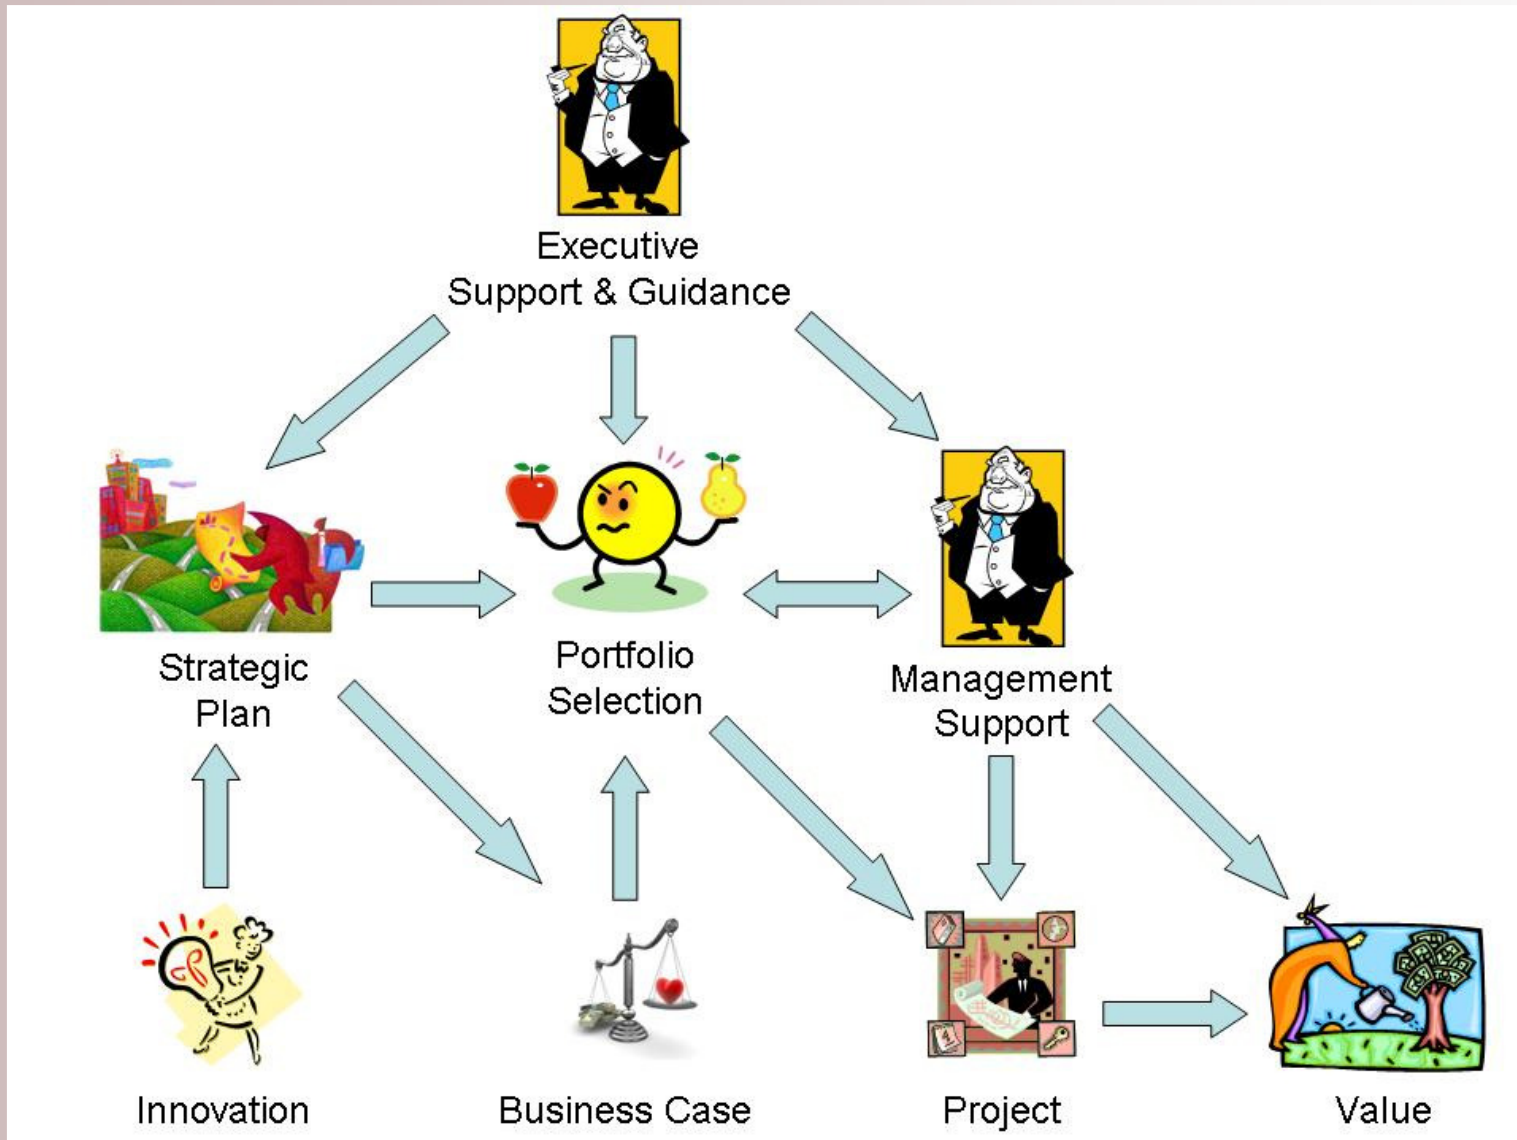

Download the White Paper:  
[https://mosaicprojects.com.au/WhitePapers/WP1084\\_Governance\\_Systems.pdf](https://mosaicprojects.com.au/WhitePapers/WP1084_Governance_Systems.pdf)

# The concept of value

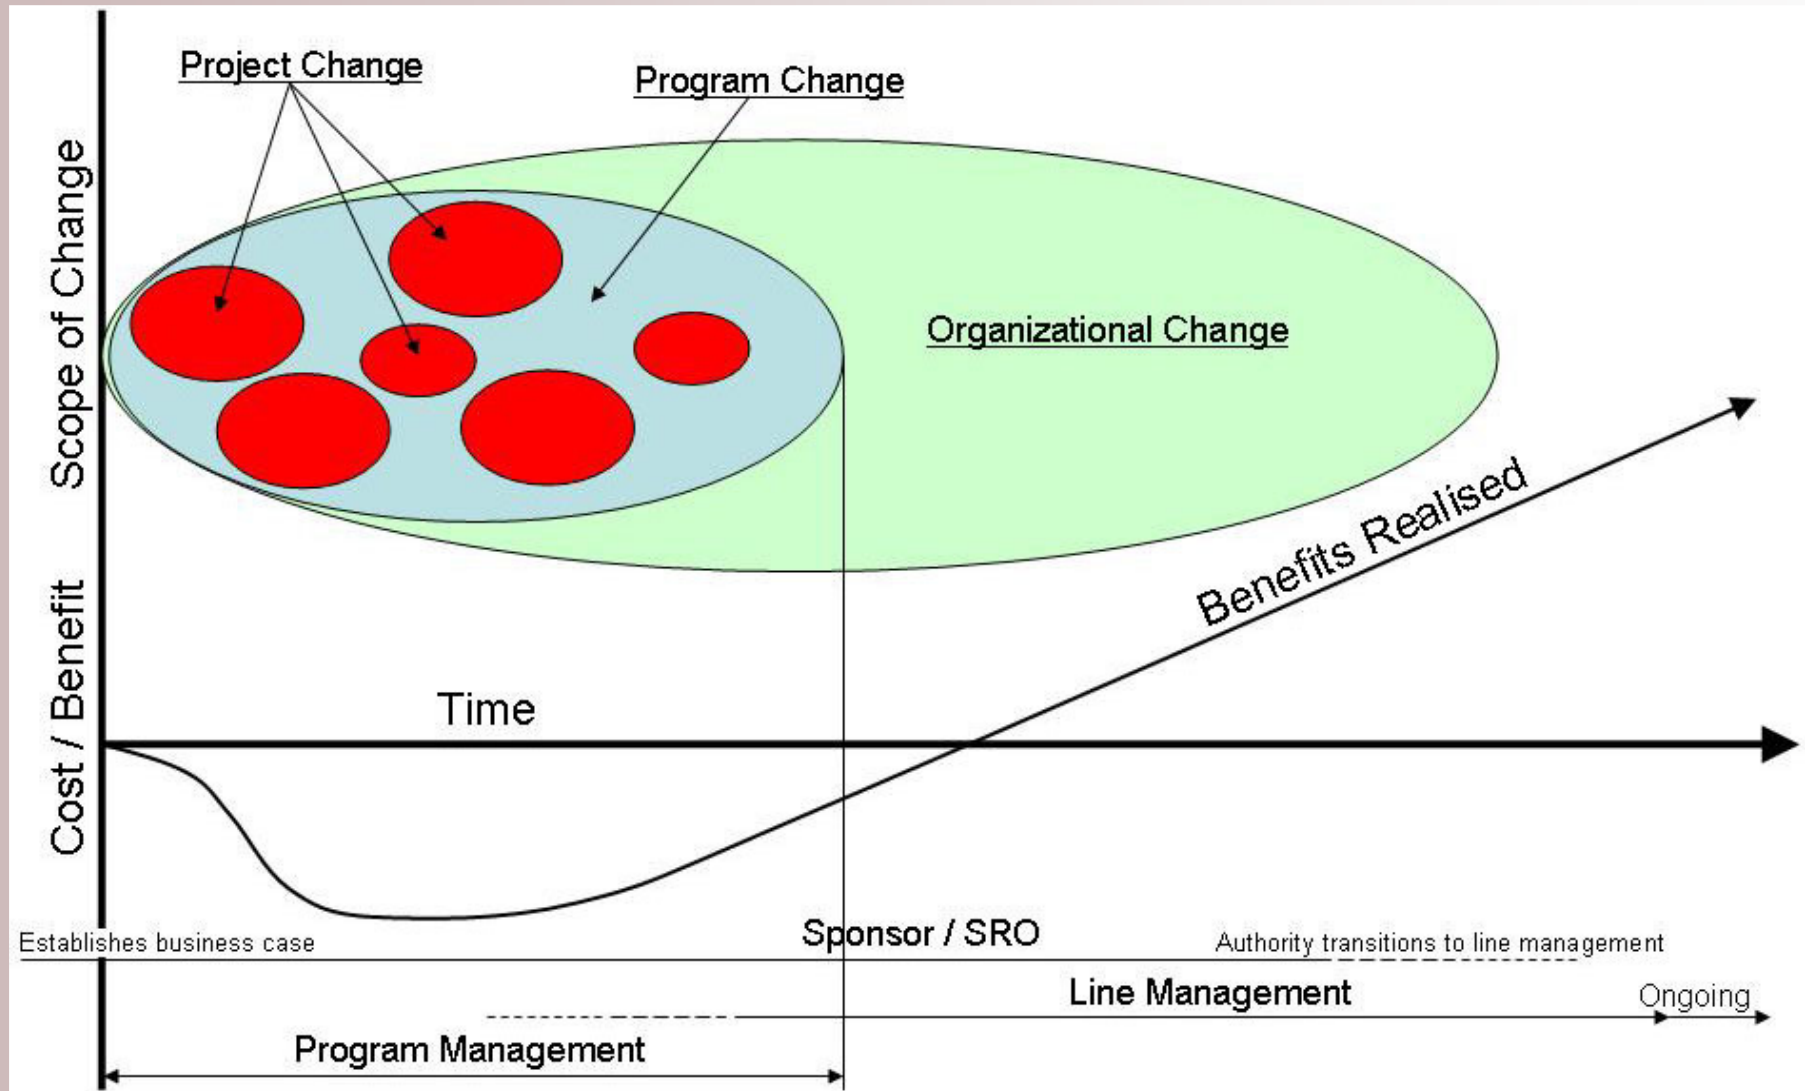

- Creating value is 'straightforward'
- The systems needed to create value are not!

# The concept of value

# The concept of value

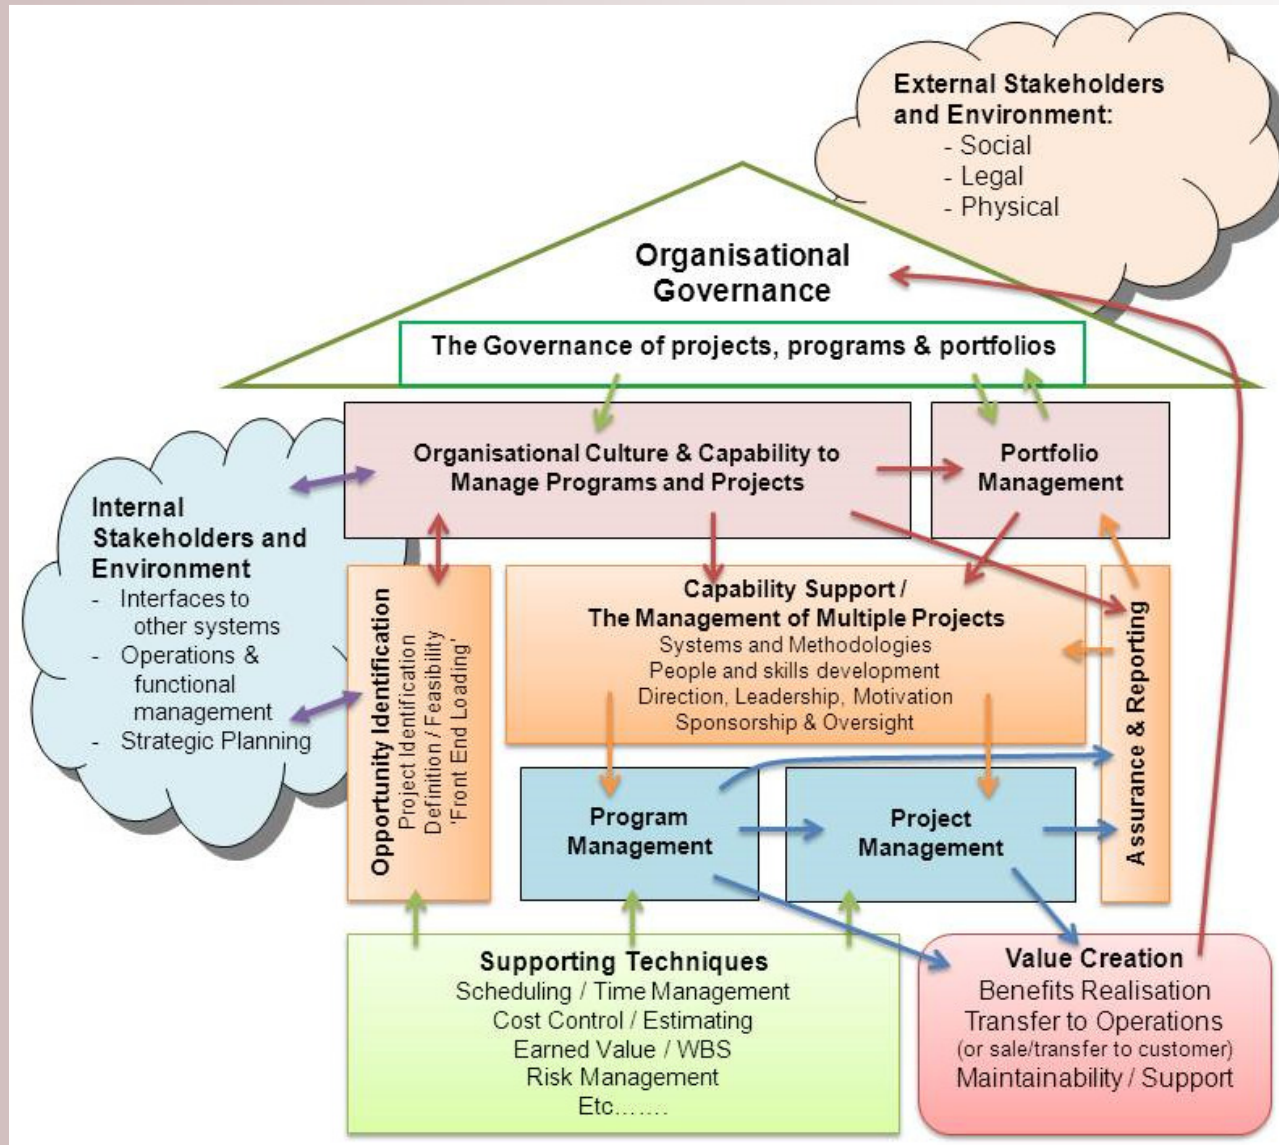

Download the White Paper:

[https://mosaicprojects.com.au/WhitePapers/WP1078\\_Change\\_Management.pdf](https://mosaicprojects.com.au/WhitePapers/WP1078_Change_Management.pdf)

# Project Delivery Capability

Download the White Paper:

[https://mosaicprojects.com.au/WhitePapers/WP1079\\_PDC.pdf](https://mosaicprojects.com.au/WhitePapers/WP1079_PDC.pdf)

# Conclusions

- Most organisations fail to realise the full value from their projects and programs!
- Two elements are missing
  - An effective Project Delivery Capability to support project management
  - An effective Value Delivery Chain
- Not investing in these is a governance failure, but:

# Conclusions

- **As a profession we are not helping!**
- We don't have a concept for PDC
  - There is no recognised name
  - There is no academic research
  - There are no recognised standards (DIN draft standard 69909 excepted)
- We confuse governance and management (particularly in IT)

# Conclusions

- We lack clout at the governance level of most organisations
- We make excuses for executive management failure
- We focus on the '*Iron Triangle*', in preference to value

# Conclusions

- 16 years ago Martin Cobb stated his paradox: ***“We know why projects fail; we know how to prevent their failure - so why do they still fail?”***
- **It's time for a change!**

# Discussion
